IoT smart life

Wi-Fi video doorbell.
Find out who's at the door.

View Door
App

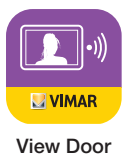

Many benefits for the user.

Easy to install and attractive to look at, the Wi-Fi video doorbell allows you to check and identify who's ringing your doorbell.

Everything is under control, at all times.

Thanks to the straightforward **View Door** App and to the integrated Wi-Fi, you can use your smartphone or tablet to check who is ringing your doorbell, even when you're out. If you add the additional wireless ringtone, you can also set up call repetition.

The **View Door** App, with its user-friendly graphic interface, allows you to receive and manage calls from the Wi-Fi video doorbell and to control the lock at home from your smartphone or tablet.

Additional component

Wireless ringtone (optional) for call repetition

Characteristics.

There are so many reasons you should choose the Wi-Fi video doorbell.
